Ad placement prices: suggestions

ev-srbija.rs · prepared 22 October 2026 · estimates for internal use, not a public price list

These are starting prices for a new site. I could not find public Serbian price lists for a comparable niche site, so treat them as a starting point to test with the first advertisers and adjust once you have real traffic data. All prices are per month, in euros, without VAT.

1. Expected visits per month

Period after launch	Visits / month	What drives it
Months 1–3	300 – 1,500	Google and AI assistants are still discovering the pages; most visits come from your own sharing (Facebook groups, forums).
Months 4–6	1,500 – 5,000	Model and brand pages start ranking for searches such as "BYD Sealion 7 Srbija" or "domet Kia EV3".
Months 7–12	5,000 – 15,000	Steady pages (subsidies, chargers map, comparisons) bring regular visits; links from news sites help a lot.
Year 2	15,000 – 40,000	Only if data stays fresh and new content keeps coming (new models, news, comparison pages).

The Serbian EV market is still small, which limits total traffic but means almost every visitor is an active buyer. That is the main argument for advertisers.

2. Starting prices (phase 1, under ~3,000 visits per month)

Code	Placement	Where	Start price
AD-01	Hero, large banner	Top of the homepage, rotating positions	€80
AD-01	Hero, side banner (each of 2)	Next to the large hero banner	€40
AD-02	Leaderboard	Homepage, after the search	€60
AD-03	Brand of the month	Homepage brand list	€80
AD-04	Partner offers (2 spots)	Homepage, after the models	€40 each
AD-05	Test drive sponsor	Dealers section	€50
–	Featured dealer ("Istaknuto")	Brand page / dealer list, per brand and city	€20
	All placements sold (one featured dealer)		**about €450 / month**

3. How prices should grow with traffic

Phase	Visits / month	Prices	Example
1	under 3,000	as in section 2	Hero large banner €80
2	3,000 – 15,000	about 2.5× the start prices	Hero large banner €200, leaderboard €150
3	over 15,000	about 5×, or price per 1,000 ad views (CPM) of €6–10	Hero large banner €400 or by views

Raise prices only with proof: wait for 2–3 months of real traffic data before moving to the next phase.

4. When two dealers want the same featured spot

- **Rotation:** several featured dealers per page, labelled "Istaknuto", in random order on each page load.
- **Cap:** at most 2–3 featured dealers per brand and city; extra demand goes on a waiting list or pays more.
- **Sell by placement:** brand page, model pages or the Distributeri city filter, instead of one exclusive spot.
- **Fixed monthly price**, first come first served, with a clear end date. Avoid auctions between dealers.

Paid listings must be labelled "Istaknuto" and their links marked as sponsored. Dealers who don't pay stay listed with full contact details.

5. Tips for the first advertisers

- **Keep "Cene na upit"** on the Oglašavanje page at the start, so you can adjust prices as you learn.
- **Founding partner deal:** 3 months for the price of 2, and the price stays fixed for a year.
- **Lead with the strongest placements:** the hero, and Brand of the month for importers launching a new model.
- **Monthly report for each advertiser** with views and clicks of their ad (from Google Analytics). This is what lets you raise prices later.
- **Sell the audience, not only the clicks:** visitors are people actively choosing an electric car in Serbia.

These figures are estimates by Claude based on general knowledge of niche websites, not market benchmarks. Contact for advertising on the site: oglasi@ev-srbija.rs.
